

SecondSkin

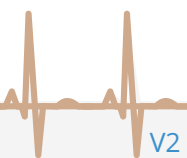

What is SecondSkin?

- ▶ SecondSkin is the world's first simulated human skin suit, designed to dramatically transform and re-skin human patient simulators.
- ▶ SecondSkin effortlessly changes a patient simulator's age, gender and ethnicity, increasing diversity and realism in simulation-based training.
- ▶ Made with tear-resistant material, SecondSkin effortlessly hides all metal and plastic on the simulator while providing learners with a realistic looking and feeling simulated patient.
- ▶ SecondSkin allows for full functionality and range of motion of the simulator it is outfitted for, while creating emotional attachment and engagement through lifelike features and diversity.
- ▶ SecondSkin allows you to enhance the investment of your current simulator platform(s) while increasing the realism!
